**COVER:** Confocal image of double-immunofluorescent staining for *PER<sub>1</sub>* (*green*) and *PER<sub>2</sub>* (*red*) of rat corpus luteum cells in section of the ovary taken at early night. The cell nuclei were visualized by DAPI staining (*blue*). The two PER proteins occur in the same cells, but at this time point *PER<sub>1</sub>* has a nuclear localization, while *PER<sub>2</sub>* is still present in the cytoplasm.
