ENDOCRINOLOGY (ISSN 0013-7227; IPM 0059668) is the official journal of The Endocrine Society and is published monthly by The Endocrine Society, 8401 Connecticut Avenue, Suite 900, Chevy Chase, MD 20815-5817. Periodicals postage paid at Chevy Chase, MD and at additional mailing offices. Subscription rates are \$447 (\$617 international); institutions \$967 (\$1,190 international); institutions on-line only \$869 (U.S. and international); in training \$258 (\$401 international); single copy \$68 (\$76 international). Society member dues of \$266 (\$334 international) includes print and online access to one primary journal and online access to an additional two primary journals. Subscription prices subject to change. All subscriptions start with the January issue. To order call (301) 941-0210. All subscription orders for customers in Japan must be placed through our exclusive agent, USACO Corporation, 17-12, Higashi-Azabu 1-chome, Minatu-ku, Tokyo 105, Japan. Telephone 03-3505-6161. Please contact USACO for 2007 yen rates. Printed in the U.S.A. POSTMASTER: Send address changes to *Endocrinology*, 8401 Connecticut Avenue, Suite 900, Chevy Chase, MD 20815-5817. Indexed by BIOSIS, Current Contents, Index Medicus, Elsevier BIOBASE/Current Awareness in Biological Sciences, National Biological Service, EMBASE/Excerpta Medica, and Sociedad Iberoamericana de Información Científica (SIIC). Printed on acid-free paper. Table of Contents and abstracts for each issue available on the issue mail date on The Endocrine Society Home Page at <http://endo.endojournals.org>. COVER: Invasive cytotrophoblasts up-regulate expression of lipoprotein lipase (LPL) at term. Tissue section of basal plate biopsy specimen from 39-wk human placenta was double stained with anticytokeritin-7 antibody (*green*), to identify fetal CTBs, and an anti-LPL antibody (*red*). Nuclei were labeled with Hoechst (*blue*). The merged image shows that the invasive (extravillous) cytotrophoblasts express LPL (*yellow*). From the article by Winn *et al.*, in this issue, pages 1059–1079.
