**COVER:** Expression of Steroid Receptor Coactivator-1 (SRC-1) in the day 0.5 pregnant mouse uterus as assayed by immunohistochemistry with an antibody for SRC-1. SRC-1 was expressed in the luminal and glandular epithelium on day 0.5 of pregnancy. The pattern of expression of SRC-1 in the uterus indicates that the SRC-1 protein plays a role in the preparation of the uterus for embryo implantation in the murine uterus.
